DUETTE® SHADE 20mm Midnight in Black Magic. Top down/bottom up.

DUETTE® SHADES 10mm & 20mm

DUETTE® SHADES provide the ultimate in versatile light control, privacy and style in any room, DUETTE® SHADES are an efficient window insulator, keeping your home warm in winter and cool in summer while saving on your energy costs. DUETTE® SHADES are made from a unique cellular honeycomb fabric that's not only an efficient insulator but its crisp, horizontal pleats provide a very attractive contemporary look. DUETTE® SHADES provide privacy, whilst softening the light to give the room a warm, gentle glow. Attractive and contemporary, DUETTE® SHADES are available in an extensive range of colours and fabric styles. DUETTE® SHADES have no unsightly seams which makes them the ideal window covering for large windows. Other options with DUETTE® SHADES include arched, circular (static only), angled windows and skylights. The 'top down / bottom up' operating option makes DUETTE® SHADES the perfect choice where privacy and ventilation are important.

CHOOSE FROM THESE DESIGN OPTIONS:

Whether you want a soft filtering effect or complete control of the sun, there is a DUETTE® operating system to meet your needs.

Top-Down Shades

Shades lower from the top only, which allows light in whilst maintaining privacy. Available with Ultragliding, Easy Rise and Standard Cord Lock Operating Systems.

Top-Down/Bottom-Up Shades

Moving centre rail and bottom rail, open the shade top down, bottom up or both. This enables you to enjoy increased light control and enhanced privacy. Available with Ultragliding and Standard Cord Lock Operating Systems.

Day-Night Shade

Having two fabrics on one shade provides the ultimate solution for both light control and privacy, as you simply adjust the amount of each fabric you would like to see, this is ideal for bedrooms. Available with Ultragliding, Standard Cord Lock and Ultragliding Operating System.

CHOOSE FROM THESE OPERATING SYSTEMS:

Standard Cord Lock

Shades stack at the top of the slim headrail for a simple traditional look. Cords can be neatly secured around cord cleats when the shade is raised.

Ultragliding Shades

Revolutionary operating system for smooth, effortless operation including gentle self lowering. The constant cord length means it's neater as well as safer for small children.

EasyRise Shades

Continuous cord loop operation to easily rise or lower larger shades. Secure window frame mounting of the cord tensioner ensures enhanced child safety.

PowerRise Shades

For ultimate convenience and control DUETTE® SHADES can be easily automated with your choice of wall switch, automated or remote options that are perfect for hard to reach windows.

Skylight Shades

Ideal for skylights, windows on sloping walls or any hard to reach windows. Can be operated with cord control or an optional extension pole.

Specialty Shapes

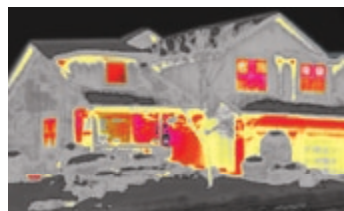

The perfect solution to almost any window shape from circles to triangles to sloped shades.

ENERGY BENEFITS

LUXAFLEX® DUETTE® SHADES are one of the most energy efficient blinds on the market. The distinctive honeycomb cells of the DUETTE® fabrics trap air creating air pockets that act as an insulator. This process achieves insulating results in a similar way achieved by the double glazing of a glass window. A white heat reflective fabric is used on the external face window side of the cell structure to reflect solar heat and aid the insulation process.

The areas in red indicate where your house is losing most of its heat. You can make substantial savings to your energy costs with Duette® Shades.

CHOOSE FROM THE EXTENSIVE DUETTE® FABRIC RANGE

The unique cellular honeycomb construction of the soft, yet durable DUETTE® SHADES makes them highly energy efficient. Whether you want a soft filtering effect or a complete control over the sun, there is a fabric to meet your needs. Manufactured from durable spun bonded polyester fabric for long term performance.

10mm Classic

DUETTE® translucent classic fabric gently filters light entering the room, whilst still maintaining privacy and protecting your furniture from the sun's harmful rays.

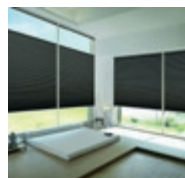

20mm Symphony

This range is a 20mm version of our classic fabric, the translucent symphony range will soften the light and help create the perfect mood in any room.

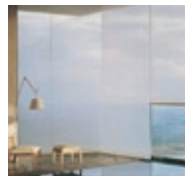

10mm Nightfall

A true blackout fabric, the metallised lining of the opaque Nightfall range provides you with the ultimate in privacy insulation and energy efficiency. Perfect for media rooms or bedrooms.

20mm Midnight

A 20mm version of the nightfall fabric for those who want a bolder, more distinctive look while providing true blackout for light control.

20mm Sheer

A beautiful transparent fabric for a softer gentler light filtering effect perfect for use with any other 20mm fabric in a Day/Night shade.

20mm Batiste

Intended variations in the weave of our translucent batiste fabric contribute to the textured look these fabrics bring to your windows.

EASYRISE & ULTRAGLIDE HEADRAIL

Uniform Headrail Design

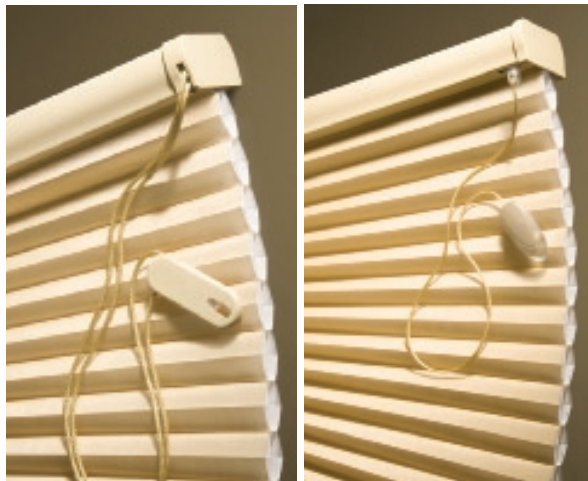

The Headrail offers a sleek and uniform Headrail design for both EasyRise and ULTRAGLIDE®.

Fabric Covered Valance

The new Headrail also features a new Fabric Covered Valance, offering an aesthetically pleasing and modern DUETTE® SHADES enhancement. The Fabric Covered Valances are supplied on all EasyRise and ULTRAGLIDE® Operating Systems. The smooth and even weave of the valance has excellent care and cleaning properties, which makes it easy to clean.

Improved Colour Co-ordination

The fabric covered valance is available in 22 different colours, which will provide colour co-ordination for the EasyRise and ULTRAGLIDE® Operating Systems. The valance colours have been matched to the existing Standard Cord Lock hardware colours to allow for greater colour co-ordination amongst DUETTE® SHADES product offer.

The comfort rating is designed to assist you in choosing the right window covering for each situation. Hunter Douglas Limited has developed the comfort rating with assistance from Canesis Pty Ltd – an independent Australian Fibre and Textile Research and Development Company.

- Heat Protection refers to the ability of material to keep heat away.
- A high insulation rating is recommended where insulation is important for the comfort of the occupants and to reduce heating or cooling costs.
- Shade Factor is defined as the level of shade that the blind provides in blocking out the direct sunlight.
- Glare Reduction is defined as the reduction in the level of glare to provide optimum eye comfort.
- UV Protection is defined as the level of UV light that is blocked out by the material.

COMFORT RATING has been devised by Hunter Douglas Limited with the assistance of Canesis Pty Ltd - an Independent Australian Fibre and Textile Research and Development Company.

CARE AND CLEANING

LUXAFLEX® DUETTE® SHADES cellular fabric is made from anti-static non-woven polyester that aids in the resistance to dust making the durable fabric easy to clean and maintain. To Keep LUXAFLEX® DUETTE® SHADES constantly looking like new, regular dusting and periodic vacuuming is ideal. Regular light dusting maintains a new-like appearance on most shades. For deeper cleaning, vacuum gently with the brush attached on any vacuum cleaner. Spot-clean shades with a soft cloth or sponge moistened in lukewarm water.
