### MONARCH FOLDING ARM AWNINGS

Specifically designed to cover large patios and decks without the support of intrusive posts and beams. The strong lateral support arms are easily extended or retracted to provide you with the level of shaded comfort you desire.

### SYSTEM 2000 ROLL UP AWNINGS

The rugged SYSTEM 2000 awning has been windload tested, withstanding strong winds. Choose from various operating systems including automated.

### ROBUSTA ROLL UP AWNINGS

Designed for larger window areas, the Robusta drop arm awning can span up to six metres. Robusta awnings are operated by crank or motor and can extend to any desired position then neatly rolled away when the sun goes down.

### FIXED FRAME FABRIC AWNINGS

Add a touch of European flair and style to your home with a LUXAFLEX fixed frame fabric awning. Available in a wide range of styles and fabrics these awnings provide excellent protection from the weather.

### ALUMINIUM AWNINGS

Durable aluminium awnings provide the optimum protection from the hot rays of the summer sun and the driving rain of the worst winter day. Choose the design to complement the architectural style of your home.

### PERGOLA AWNINGS

This innovative awning spans up to five metres. Automated and fully retractable the Pergola awning is ideal for pergola and conservatories with the angle of installation ranging from horizontal through to 45° angle.

COMBINING FASHION AND PRACTICALITY, AWNINGS PROVIDE OPTIMUM PROTECTION FROM THE WEATHER AND THERE IS AN AWNING DESIGN TO MEET EVERY NEED

#### AWNING AUTOMATION

Choose the LUXAFLEX® awning design that best meets your needs for protection from the weather or to make the most of your indoor outdoor living areas. Whichever LUXAFLEX® awning you select you can rest assured that it has been designed and built to last.

Only robust, corrosion resistant components and strong fade resistant fabrics are used in the manufacture of LUXAFLEX® awnings. The fabrics are treated to resist mould and mildew, which makes them easy to keep clean and looking as new. Not only will your LUXAFLEX® awning perform well it will enhance the appearance and add value to your home.

Of course, LUXAFLEX® retractable awnings can be easily automated for the ultimate in convenience, comfort and safety. Full automatic control provides continuous protection as your awnings operate automatically in response to the climate or your specific requirements.

A wind force sensor reacts to adverse wind conditions while a sun sensor can be programmed to respond when a pre-set level of light intensity is reached. You can programme your awning to operate at set times, even when you're not at home.

A range of control options are available including wall switches, radio remote, wireless switches, sun and wind sensors, timer or memory controls.
