## why choose a canopy awning?

LUXAFLEX® Canopy Awnings are like nothing else in the New Zealand market. Contemporary European design and style that delivers premium performance in the harshest New Zealand environments. Suitable for both domestic and commercial applications, from single door or window installations to complete building protection.

When you purchase a LUXAFLEX® Canopy Awning you're investing in your home. That's why Canopy Awnings are designed with durability and performance in mind. Our range of canopies are available in three board finishes along with bracketing systems that allow continuous modules of canopy to be installed, these features combined with the availability of both 600mm and 1000mm projections. Canopy Awnings built to perform to the highest standards, providing weatherproof comfort and style to any environment.

LUXAFLEX® Canopy Awnings can be installed onto wood, brick or concrete. They enhance the look of your property and provide protection from the elements.

## Leesun board – enhanced polycarbonate

### CATEGORY 12 TYPHOON RESISTANT

New Zealand is prone to extreme changes in outdoor weather, from high speed winds to rain and snow. To ensure your home is protected, canopy awnings are thoroughly tested and assured to the most extreme weather conditions possible. Rest assured that whatever the weather, canopy awnings are built strong.

### UV RESISTANT

Everyone knows what damage can be caused by prolonged exposure to the sun. Canopy awnings are designed to prevent 99% of the sun's harmful UV rays, protecting your home and family.

### CHEMICAL AND FIRE RESISTANT

Canopy awnings are specially coated with a unique formula to protect them from abrasive cleaning chemicals and damaging elements of heat and fire.

### IMPACT RESISTANCE

Life is unpredictable, with canopy awnings you're covered. Tested in various situations, leesun board is tough, 15-20 times stronger than acrylic.

## Aluminium composite board

### DOUBLE LAYER COMPOSITE CONSTRUCTION

Canopy awnings are the first in the world to use composite construction techniques to achieve the highest quality. Aluminium canopy awnings are double aluminium coated with a plastic core, allowing for strength, durability and versatility. Combined with layers of protective outdoor colour coating canopy awnings are designed to look good all year round.\*  
\* Canopy awnings may require regular cleaning depending on the outdoor environment.

### WEATHER RESISTANT

New Zealand is prone to extreme changes in outdoor weather, from high wind speeds to rain and snow. To ensure your home is protected, canopy awnings are thoroughly tested and assured to last whatever the weather.

### CHEMICAL AND FIRE RESISTANT

Aluminium canopy awnings are specially coated with a unique formula to protect them from abrasive cleaning chemicals and damaging elements of heat and fire.
