# technical information and comfort ratings

## AUTOMATION

Many of our products can be automated, removing the need to manually operate your blinds. Automation really is the ultimate in child safety, look for 'the hand' icon to see which products can be automated.

## CHILD SAFETY

Child safety is a critical issue and one that we have addressed with the availability of Child Safety devices as options on your blinds.

We continually monitor standards to ensure our Luxaflex® products comply with applicable safety standards and are safe for you and your child.

## COMFORT RATING

The comfort rating is designed to assist you in choosing the right window covering for each situation. Hunter Douglas Limited has developed the comfort rating with assistance from Canesis Pty Ltd – an independent Australian Fibre and Textile Research and Development Company.

Heat Protection refers to the ability of material to keep heat away.

A high insulation rating is recommended where insulation is important for the comfort of the occupants and to reduce heating or cooling costs.

Shade Factor is defined as the level of shade that the blind provides in blocking out the direct sunlight.

Glare Reduction is defined as the reduction in the level of glare to provide optimum eye comfort.

UV Protection is defined as the level of UV light that is blocked out by the material.

- ◆ No protection/performance
- ◆◆ Low level of protection/performance
- ◆◆◆ Medium level of protection/performance
- ◆◆◆◆ High level of protection/performance
- ◆◆◆◆◆ Highest level of protection/performance

# COMFORT RATING has been devised by Hunter Douglas Limited with the assistance of Canesis Pty Ltd - an Independent Australian Fibre and Textile Research and Development Company.

## FEATURES AND BENEFITS

**SANITIZED®** fabric treatment inhibits the growth of bacteria, fungi, dust mites and odour, welcome news for those with respiratory issues.

**FIRE RETARDANT** gives you extra peace of mind. It has been carefully formulated so it does not affect the texture and feel of the fabric.

**DURAGUARD®** exclusively developed for the rigours that blinds have to face. The fabric will repel most staining agents. It is much easier to clean and keeps its pristine look for longer.

**OEKO TEX CERTIFIED** is a testing certification to ensure products all meet the requirements for the exclusion of harmful substances.

**TEFLON® FABRIC PROTECTOR** provides long lasting protection against oil and water based stains, as well as dust and dry soil. The fabric is easier to take care of but does not affect the colour, breathability or texture of the fabric.

## FUNCTIONAL STYLE AND DURABILITY

Create custom made Luxaflex® Rollershades and Sunscreens from our vast collection of beautiful fabrics in a variety of colours, textures and transparency levels.

Luxaflex® offers the ultimate in traditional value, style and durability within the Rollershade and Sunscreen product ranges. Manufactured using premium grade components Luxaflex® Rollershades and Sunscreens are custom-made to suit your individual requirements.

Operate your Rollershades and Sunscreens with ease. Control options include the classic standard chain drive, chainless spring operation or fully automated systems providing the ultimate in Child Safety.

Luxaflex® Rollershades and Sunscreens feature new generation fabrics providing advanced light, glare and heat control. The fabrics are cut in our state of the art factory using the latest in ultrasonic technology for improved performance.

Luxaflex® Sunscreens allow the flow of light and ventilation by way of the 'openness factor' of the fabric, allowing you to maintain your external views while reducing the impact of heat, glare and UV rays by up to 95%.

Luxaflex® offers a wide range of Rollershade and Sunscreen fabrics; many of these fabrics including the polymer coated glass Sunscreen range are woven in Australia to withstand the harshest Australasian conditions.

duette® shades

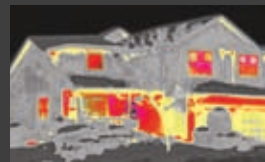

## DESIGN AND INNOVATION

Luxaflex® Duette® Shades provide the ultimate in versatile light control, privacy and style in any room and are an efficient window insulator, keeping your home warm in winter and cool in summer while saving on your energy costs.

Luxaflex® Duette® Shades are made from a unique cellular honeycomb fabric that's not only an efficient insulator but its crisp, horizontal pleats provide a very attractive contemporary look. Duette® Shades provide privacy, whilst softening the light to give a room a warm, gentle glow. Attractive and contemporary, Duette® Shades are available in a range of colours and fabric styles.

Luxaflex® Duette® Shades have no unsightly seams which make them the ideal window covering for large windows. Other options with Duette® Shades include arched, circular, angled windows and skylights. The 'top down / bottom up' option makes Duette® Shades the perfect choice where privacy and ventilation are important.

## ENERGY EFFICIENCY

The areas in red indicate where your house is losing most of its heat. With windows making up 27% of the average home, this equates to a large percentage of the home's heating and cooling energy being lost through them. Adding Duette® shades to your windows can drastically reduce the heat transfer through your windows. Independent modelling has shown this reduction to be up to 83% when compared to other window coverings. This winter, make substantial savings on your energy costs simply by including Duette® shades in your home today.

## UNDERSTATED ELEGANCE

The Luxaflex® Pleated Blind range provides true style and versatility, combining the latest fabric technologies with window covering solutions for both residential and commercial applications.

Pleated blind fabrics are manufactured from environmentally friendly 100% CS Trevira Polyester, aluminium particles are vacuum bonded to the reverse side of the fabric to achieve improved insulation performance. The addition of the aluminium coating allows warm air to be retained within the room over the winter months.

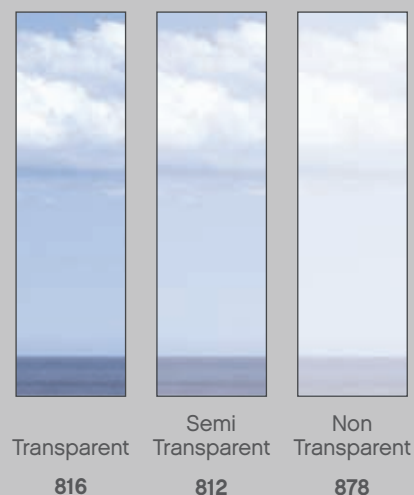

Pleated blinds are now manufactured from the latest generation metallised fabrics, which are available in wider width blankets

which allow larger blinds to be manufactured without having to overlap the individual pieces of fabric.

Specialist products such as the Luxaflex® Pleated Day/Night blinds which combine the 816 Transparent and 878 Non Transparent fabrics into the one blind are also available. This option allows you to maintain your views with UV protection while providing night time privacy and insulation.

Luxaflex® Pleated blinds will also provide these levels of performance in a wide variety of window styles such as skylights and out of the ordinary shapes such as arches and triangular windows.

# countrywoods® and woodmates® venetians

## ENJOY THE NATURAL BEAUTY OF TIMBER

**Luxaflex® Countrywoods® Timber Venetians** are the perfect choice if you appreciate the look and feel of natural timber or painted neutral colour tones.

The Countrywoods® Timber Venetian blind collection is available in 25mm, 46mm and 60mm slats, with colour co-ordinated components. Luxaflex® Countrywoods® Timber Venetians lend themselves to many interior styles from country, colonial or contemporary; providing light and heat control, whilst adding style and value to your home.

Countrywoods® Timber Venetians can be easily Automated for the ultimate in luxury and convenience. Full raise, lower, open and close functions are available with wall mounted, hand held remote or sensor / timer controlled operation.

Luxaflex® Countrywoods® Venetians can be custom finished with 'e-cote UV' a revolutionary acrylic lacquer that offers the highest UV resistance available. 'e-cote UV' paint is cured in UV ovens to produce a hard, durable and extremely smooth finish; fading is inhibited using automotive pigments in the paint. 'e-cote UV' coated products are suitable for use in damp areas such as bathrooms but are not recommended for continual contact with water.

**Luxaflex® Woodmates® Venetians** are the alternative wooden blind that looks and feels like real timber. Made from 100% Polyresin, using a manufacturing process that makes the slats more rigid and durable, this attractive wood grain effect provides the look of wood.

The slats are resistant to heat and humidity and UV protected, they will resist warping, chipping and cracking. With a choice of two slat widths, 50mm and 64mm and attractive matching valance.

The colour range includes a palette of whites and neutrals, this is complemented by a timber look with natural wood grain, offering you a range of colours that will complement any decor. Luxaflex® Woodmates® are equally at home in your living room, as well as high humidity areas like bathrooms, laundries and kitchens.

## COMBINATION OF FUNCTIONALITY & DURABILITY

Luxaflex® Countrywoods® Shutters provide the timeless beauty and enduring craftsmanship of real timber, custom made for your home.

Luxaflex® Countrywoods® Shutters are a beautiful combination of functionality, durability and practicality in a window covering. They are more than just a basic window covering; providing light and heat control, whilst adding style and value to your home. Each Shutter is custom made to your window or doors exact specifications.

Luxaflex® Countrywoods® Shutters are manufactured from premium quality kiln dried solid Basswood. Basswood is a timber that is light, strong and extremely stable. Louvres and profiles are carefully prepared and undergo an exacting process to ensure a fine lustrous and durable finish.

Luxaflex® Countrywoods® Shutters feature a modern colour range including four painted finishes and twenty two stains to suit any interior colour scheme.

### Frame and Mounting Options

With a variety of frame style and mounting options, there is a shutter system available to suit your window or door application.

**Standard hinged:** The standard hinged option is suitable for small to medium window widths.

**Hinged bi-fold & bi-fold on track:** This system has one panel bi-folding off another, sometimes requiring a track depending on dimensions.

**Sliding on track:** Sliding applications require the use of a top track and either bottom guides or a bottom track. The panels do not open or bi-fold, but rather slide left to right on either one, two, or three tracks.
