LUXAFLEX® PLEATED BLINDS

LUXAFLEX® PLEATED BLINDS

## LUXAFLEX® PLEATED BLINDS

The Luxaflex® Pleated Blind range provides true style and versatility. Pleated Blinds not only provide privacy, sun and light control, they look stunning in any setting from traditional through to easy living and ultra modern. Choose from a vast array of fade-resistant fabrics including pastels, neutrals and solid colours, in translucent through to opaque options.

Each fabric has a metallised backing to insulate your window against the heat of the summer sun, yet retaining warmth during the cold winter months. Metallised fabrics are made from Trevira CS 100% Polyester and are vacuum bonded with aluminium on the reverse side providing a consistent external appearance.

Combine 816 Transparent fabric with the 878 Non Transparent in the Luxaflex® Day/Night blind to provide night time privacy with day time versatility and UV protection.

All Luxaflex® Pleated Blinds are heat set to retain a crisp, neat appearance and when fully raised form a tightly packed narrow stack. Luxaflex® Pleated Blinds can be used for a wide variety of window shapes and sizes including skylights, arched and triangular.

### CHILD SAFETY

Child safety is a critical issue and one that we have addressed with the availability of child safety devices as options on your blinds. We continually monitor standards to ensure our Luxaflex® products comply with applicable safety standards and are safe for you and your child.

Luxaflex® Pleated blind can be automated, removing the need to manually operate your Pleated blinds. Automation really is the ultimate in child safety, your blinds can be operated through a wall mounted switch, a slender platinum remote or complete integration with today's new "Smart Home" technology.

### CLEANING

Luxaflex® Pleated blind are anti-static and therefore repel dust and dirt. Avoid installation in humid rooms and contact with water. Dusting or vacuuming an average of twice per year is sufficient to keep Luxaflex® Pleated blinds in good condition. When using a vacuum cleaner, set it to a gentle level of suction and use an attachment with a soft brush.

### FIRE RETARDANT

Another important feature of these fabrics is fire retardant, giving you extra peace of mind. This has been carefully formulated so it does not affect the texture and feel of the fabric, so they maintain their good looks and appearance.
