

Luminette® Privacy Sheers  
Silhouette® Shadings  
Pleated Blinds

# Softshades

The world's most admired  
window coverings —————

*Luxaflex*®

*Silhouette® Shadings*

# Beauty is in the details

Luxaflex® has been adding style and sophistication to New Zealand windows since the 1950's.

Our design heritage is founded on innovation for today and tomorrow while taking care to celebrate the beauty in the details. To us, form and function are synonymous. Consistently pushing the boundaries, we are proud to be the market-leaders in daylight regulation and solar heat control solutions.

*Silhouette® Shadings*

# Luminette® Privacy Sheers

Luminette® Privacy Sheers have Vertical Vanes of Translucent or Room Darkening fabric that can be opened and closed to control privacy and diffuse light. They can span large doors and windows, protect furnishings from fading and adjust so that you can screen bright sun without obscuring the view.

---

## Unique style

Luminette® Privacy Sheers are a Luxaflex® innovation - a beautiful blend of light control and functionality. They are ideal for living rooms, as well as bedrooms where total darkness isn't required.

---

## Vane size

The Luminette Privacy Sheers come in a classic 89mm for understated elegance. They are ideal for doors or windows because the soft, curved vertical shades can be easily opened, allowing instant access.

---

## Preserve the view

You can have a soft-focus view when shades are drawn and vanes are open and full view when shades are open. Sheer fabrics also disperse sunlight deep into the room, reducing need for artificial lighting

---

## Exciting fabric

Make your selection from many colours and textures, including neutrals, earthy tones, linear patterns, linen textures and whites.

---

## Fabric Options

**Translucent**  
Luminette® Privacy Sheers made with translucent fabric diffuse light to provide a soft glow. When the vanes are open, the view is still visible.

**Room darkening**  
When room darkening fabric is selected for Luminette® Privacy Sheers, the vanes can be closed to achieve complete privacy.

## Operating Systems

**Travelling Wand/Combination Wand Cord**  
The combined Wand/Cord traverses the fabrics through a cord operation. Twist the wand to rotate the vanes. The Wand/Cord always stays in the same position, unlike the Travelling Wand.

**PowerView Automation**  
The latest innovation that fits perfectly with today's connected lifestyle. PowerView® Automation enables intelligent, automation across our proprietary Softshade window coverings with a simple press of a button, tap of a mobile device or by scheduling Scenes that will automatically activate throughout the day. Compatible with Apple HomeKit.

# Silhouette® Shadings

Silhouette® Shadings have two layers of Translucent or Room Darkening fabric separated by a series of floating, soft fabric vanes. When Vanes are closed the shades provide privacy and up to 99% UV protection. When Vanes are open the shades diffuse the light, giving the room a soft glow.

---

## Something different

Silhouette® Shadings are a Luxaflex® invention that can give your home a special point of difference. They're especially well-suited to living and office areas.

---

## Vane size

The 50mm size provides a classic, understated look. The 65mm and 75mm sizes make a bolder design statement and add drama to any window.

---

## Heat reflection

The white backing reduces heat transmission while you maintain a soft-focus view when vanes are open.

---

## Superior UV protection

All Silhouette® fabrics protect furnishings and artworks from UV fading and damage. When closed they provide up to 99% UV protection.

---

## Fabric Options

**Translucent**  
Silhouette® Shadings made with translucent fabric diffuse light to provide a soft glow. When the vanes are open, the view is still visible.

**Room darkening**  
When room darkening fabric is selected for Silhouette® Shadings, the vanes can be closed to achieve complete privacy without total blackout.

## Operating Systems

**EasyRise Cord Loop**  
A continuous looped cord that allows for adjustment of the fabric vanes from open to closed and anywhere in between. The degree of maximum vane closure varies slightly from the top to the bottom of the shade.

**Ultraglide®**  
Simply pull the cord towards the centre and down in long even strokes. As the cord is pulled it works with a crank inside the headrail to wind the shade upwards in stages, while the cord retracts to its original position after each pull.

**PowerView Automation**  
The latest innovation that fits perfectly with today's connected lifestyle. PowerView® Automation enables intelligent automation with a simple press of a button or tap of a mobile device. Battery and DC adapter options available. Compatible with Apple HomeKit.

# Pleated Blinds

Made from special fabric that has a metallised backing for superior heat reflectance, Luxaflex® Pleated Blinds give your windows a crisply tailored look. You can select a semi-transparent, light-filtering or non-transparent fabric, or combine two fabric choices for a Day-Night solution.

---

## Contemporary Aesthetic

Horizontal pleats have a neatly tailored appearance that's beautifully compatible with residential and commercial contemporary architecture.

---

## Configuration

As well as the standard up/down configuration, you can choose top-down/bottom-up shades for greater control, or day-night shades that incorporate a Semi-transparent for the day and Non-transparent for the night.

---

## Superior Insulation®

Fabric with a metallised backing helps to keep your home cool in summer by reflecting the heat back out the window. Fabrics are vacuum bonded to ensure a consistent external appearance.

---

## Versatile

Pleated Blinds can be fitted to irregular windows, such as triangles, arches and skylights. Three levels of fabric transparency allow you to choose the best solution for each room.

---

## Fabric Options

### Semi-transparent

Semi-transparent fabric softly filters the light and allows for view-through. Adding a metallised backing to Trevira CS or Polyester fabric improves insulation properties, helping to keep your home warm in winter and cool in summer.

### Light-filtering

Light-filtering fabric screens out harsh light whilst still providing daytime privacy. Made from a proprietary fabric that has a metallised backing for superior insulation, Luxaflex® Pleated Blinds give your windows a crisply tailored look.

### Non-transparent

Non-transparent fabric provides privacy and increased room darkening. When high temperatures, intense light levels and glare combine to make rooms unbearable, 878 Non-transparent fabric offers very high reflective and insulation properties.

## Operating Systems

### Somfy® Automation

Hard-wired automation using a 240V motor. Controlled by a Wall Switch or Remote Control. Headbox and frame anodised aluminium.

### Standard Cord Lock

For a traditional look that adapts to any window with the cords neatly secured by cleats.
