The world's most admired
shade solutions

Luxaflex[®]

Beauty is in the details

Luxaflex® has been adding style and sophistication to New Zealand windows since the 1950's.

Our design heritage is founded on innovation for today and tomorrow while taking care to celebrate the beauty in the details. To us, form and function are synonymous. Consistently pushing the boundaries, we are proud to be the market-leaders in daylight regulation and solar heat control solutions.

Te Rā Folding Arm Awning

Te Rā Folding Arm Awning

Te Rā Folding Arm Awnings

Swedish designed awnings that will outperform anything you've seen before, whatever the weather. Our worldwide search for the best solutions for New Zealand conditions brings you a range of innovative heavy-duty awnings that deliver unparalleled functionality.

Stability & strength

The Dyneema-tape connection used over the elbow joints and arm brackets on Te Rā awnings is 15 times stronger than steel on a weight-for-weight basis. Plus it's UV, chemical and moisture resistant to provide a durable and yet lightweight material that further improves the stability and tension provided by the awning's heavy-duty springs.

Awning coverage

The robust retractable arms on a Te Rā awning allow for maximum spans of seven metres in width and are capable of projecting up to four metres out from the building. This very generous coverage requires no posts or other structures for support (base structure allowing), thereby maximising your freedom to enjoy the cover provided and ensuring that the awning presents a clearer visual appearance.

Colours

All Te Rā awnings hardware comes in three standard colours: Gravel, Silver and White. This enables different components and accessories to be used across the entire range, further enhancing your ability to choose the awning solution that's right for you.

Optional extras

Depending on your model there are a range of optional extras to enhance the performance and capability of your awning. This includes a roller valance for additional sun protection, pitch control to better control shade, telescopic arms to increase wind resistance, and rain hoods for improved fabric protection when not in use.

The details

Fabric Options

We have a large range of colours available in fabrics suitable for Te Rā Folding awnings. Check out our website or your nearest dealer for more details.

Dickson® Orchestra

Is the awning fabric of choice when it comes to solar protection, guaranteeing excellent, long-term protection against UV rays, heat, glare and inclement weather.

Models

Te Rā Origin

A proven design that utilises a simple square bar for easy installation in a wide variety of locations.

Te Rā Eclipse

This solution is for installations that necessitate a narrow awning without compromising on weather protection.

Te Rā Viento

By including a compact semi-enclosure feature Te Rā has created an awning system that protects the fabric from the elements when not in use.

Te Rā Euro

The durable and very good looking Te Rā Euro folding arm awning will add style and sophistication to any outdoor setting.

Accessories

Roller Valance

Add an additional screening fabric to your awning, which is easily operated by a Crank Handle and stores away when not in use. Not available with Te Rā Origin or Viento.

Telescopic Arm

A Telescopic Pole can be used in windy conditions to stabilise the front bar, increasing your awning's wind resistance and extending its life. These poles are collapsible for easy storage. Not available with Te Rā Viento.

Rain Hood

An optional Rain Hood is a stylish accessory that will provide improved fabric protection from the elements and extend the life of your awning's fabric. Not available with Te Rā Viento.

Pitch Control

Te Rā Origin, Euro, and Beam awnings have an optional adjustment function that allows you to vary the pitch of the Awning from -5° to -40° to better control Shade.

Operating Systems

Motorisation

Operate your awning with the touch of a button using either a wall switch, remote control, Somfy® Connexoon or for complete automation consider sun and wind sensors and voice activation.

Te Rā Folding Arm Awning

Cabrera Full Cassette Awning

Cabrera Full Cassette Folding Arm Awnings

Extend your outdoor lifestyle with one touch of a button; the Cabrera Awning extends to put an attractive shade barrier between you and New Zealand's harsh ultraviolet rays. Custom-made to fit your property and available in an extensive range of fabric choices, it adds value and style to your home.

Custom-made

The Cabrera Awning is custom-made for each installation and comes with a range of projection options. 'Projection' describes how far the awning extends, and the Cabrera Awning is available with 2m, 2.5m, 3m or 3.5m.

Extensive range

Choose from a huge range of fabric colours and designs, all manufactured from water-repellent, marine-grade 100% acrylic with a UPF rating of 50+. The Folding Arms come in your choice of Anodised Silver or White Powder Coat, and the décor trim kit is available in Silver, White or Graphite.

Automation & integration

Using premium European electric motors, the Cabrera Awning extends or retracts with the push of one button. Choose remote control, wall switch or both. Awning controls can also be integrated into home automation systems. Your awning can also have a wind/sun sensor, which will automatically close the awning once the wind reaches the programmed safety level or extend the awning when sun is detected.

Peace of mind

Cabrera Awnings come with the Luxaflex® three-year guarantee as standard, allowing for peace of mind knowing that your Awning is covered.

The details

Fabric Options

Our large colour range of fabrics for Cabrera are all water resistant ensuring water run off when it rains, giving longevity to the awning. Check out our website or your nearest dealer for more details.

Dickson® Orchestra

The awning and marine fabric of choice when it comes to solar protection, guaranteeing excellent, long-term protection against UV rays, heat, glare and inclement weather.

Accessories

Protective cassette housing

When not in use, the Cabrera Awning is entirely enclosed by a protective aluminium cassette. This ensures that fabric and components are shielded when not in use.

Décor kit

Add extra style to your Cabrera Awning with an integrated décor kit, which includes covers for the end caps and a decorative strip for the front profile. Available in silver, white or graphite.

Superior components

Arm components and profiles are made from corrosion resistant aluminium and the elbow joints are fitted with Dyneema® connections to improve awning stability. Heavy-duty springs ensure optimal fabric tension.

Component colours

Anodised silver is one of two hardware colour choices for Cabrera awnings and can bring a modern or contemporary look to your cassette and arm components.

White powder coat is the second colour choice and can be used to achieve a fresh and clean, or traditional aesthetic.

Operating Systems

Motorisation

Automation Control is via hand-held Remote or Wall Switch options. You can also opt to integrate the awning control into your home Automation System or have it respond to Wind and Solar Sensors.
